

## Product Highlight

Company Name

S.M. Chemical Supplies Co., Ltd.

Product Highlight 1

Description Product  
Highlight 1

Explore more than 300,000 research chemical and consumables from **Sigma-Aldrich and Merck**. Wide selection of biochemicals, organic / inorganic chemicals, solvents, reference standards and chromatography products.

## Product Highlight 2

## Microbiome Analysis Services

### Description Product Highlight 2

Microbiome Analysis Services from Zymo Research, USA..Complete Solutions for the Most Accurate Microbiome Profiling.

**1. 16S/ITS Amplicon Sequencing Service**

Identification of Bacteria, Archaea, & Fungi From Any Microbiome Sample

**2. Shotgun Metagenomic Sequencing Service**

Unbiased Microbe Detection

**3. Metatranscriptomic Sequencing**

Microbiome gene expression analysis.

**4. Custom Solutions for Industry Partners**

Our microbiome analysis services can be customized to meet the individual needs of your application.

### Product Highlight 3

# eppendorf

## Bioprocess

### Description Product Highlight 3

Our **Eppendorf bioprocess solutions** are successfully used in these industries and in applied research for decades. By exploiting the strong synergies in bioreactor technology and polymer manufacturing, Eppendorf has emerged as a global player and valuable resource to its customers. With an integrated portfolio comprising software, instruments, consumables, and services, we can satisfy the demands of bioprocess development through production. In that way and in line with our corporate mission, we contribute to the efforts of Eppendorf customers worldwide to improve human living conditions.

## Product Highlight 4

## Ion Chromatography System

### Description Product Highlight 4

#### High Speed Ion Chromatography System IC-8100

IC-8100 series is a high-performance & high-speed Ion Chromatography system which integrates with TSKgel® high speed & high-resolution column technology that can realize high throughput analysis.

The measurement time is within **5 minutes** for both common Anions and Cations. Tosoh's original gel replacing type suppressor enables stable analysis at a low cost. With the auto eluent generator unit, you are free from the anxiety of daily eluent preparation and preparation errors.

#### Key Features:

- High-throughput analysis within 5 minutes
- High-function: Eluent and Flow Gradient function
- High-sensitivity: Automatic gel replacing suppressor system

## Product Highlight 5

## Description Product Highlight 5

**Milli-Q® Lab Water Solutions** portfolio of benchtop water systems includes both pure and ultrapure systems to meet any lab's needs. From sensitive QC analyses to buffer preparation and glassware rinsing, this collection of compact systems has your lab covered. Our specialists can help you find the water purification solution that's best adapted to your requirements in terms of:

- Applications
- Water quality grade
- Volume demand
- Lab configuration
- Budget
- Remote monitoring
- Sustainability goals
